**20 April 2024**

Dear Trimble Hiring Team,

As a creative multidisciplinary with an eye for design, I was excited to learn of an open opportunity for a UX Designer position at Trimble. My front-end work has been an academic, personal, and professional journey, with my experience ranging from community collaboration to development in an office setting. Since graduating with an Associate's Degree in Interface Design and Web Development, I have spent the last three years working as the sole web developer at the Raritan Public Library.

My time working with the Raritan Public Library has been spent focusing on redesigning and maintaining their previous website (design and functionality circa 2008) and bringing it up to date with modern UI/UX standards along with SEO and accessibility. I have also contributed UX design skills to an undergraduate club and community at the University of Illinois Urbana-Champaign. Using React and TypeScript, I have collaborated with other contributors to create the front-end for an application that sees frequent use at tournaments with over 100 participants.

Trimble is driven by community, innovation, and growth, and as someone with strong experience and passion for design, that is something I would love to be a part of. Both my professional and personal work has prepared me for an opportunity as such, and I am eager to hear back from your hiring committee.

Sincerely,

A handwritten signature in black ink, appearing to read 'Spencer Gunning'.
